Table of content:

Front End CRC Cards:

Card 1
Component: Login Page
Place: \frontend\src\components\Login.js
Parent Class: None SubClass: None

Responsibilities: Allow the user to register a new email and password. It also provide users some feedback about the current process.	**Collaborator**: Edit Text, Button

Card 2
Component: Navbar
Place: \frontend\src\components\NavBar\NavBar.js
Parent Class: None SubClass: None

Responsibilities: Show the dropdowns. Allow users to navigate between different pages.	**Collaborator**: StockPage,Clock, Trade, View, Button

Card 3	
Component: Register Page	
Place: \frontend\src\components\Register.js	
Parent Class: None SubClass: None	
Responsibilities: Allow users to register to register an account. It also reminds users when they type an invalid input.	**Collaborator**: Login, Stock, Button

Card 4	
Component: Clock	
Place: \frontend\src\components\Clock.js	
Parent Class: None SubClass: None	
Responsibilities: Show different time zone times. Users can also set the alarm to remind them.	**Collaborator**: Alarm

Card 5	
Component: Currency	
Place: \frontend\src\components\Login.js	
Parent Class: None SubClass: None	

Responsibilities: Show the current exchange rate. It also allows users to exchange currency online.	**Collaborator**:

Card 6	
Component: Chatbox	
Place: \frontend\src\components\chatBox.js	
Parent Class: None SubClass: None	
Responsibilities: Allow users to chat with other users among their friend list. Users also can send image or their balance record through this page	**Collaborator**: Edit Text

Card 7	
Component: Trade	
Place: \frontend\src\components\Trade.js	
Parent Class: None SubClass: None	
Responsibilities: It allows users to trade stocks. It also shows users the remendations.	**Collaborator**:

Card 8	
Component: View	
Place: \frontend\src\components\View.js	

Parent Class: None SubClass: None	
Responsibilities: Show users the image and their different stock status.	**Collaborator**:

Card 9
Component: Button
Place: \frontend\src\components\Button.js
Parent Class: None SubClass: None

Responsibilities: It allows users to interact with the website by clicking.	**Collaborator**:

Card 10
Component: Edit Text (password box etc)
Place: \frontend\src\components\editText.js
Parent Class: None SubClass: None

Responsibilities: It allows users to input information through the input box.	**Collaborator**:

Card 11
Component: Stock

Place: \frontend\src\Stock.js	
Parent Class: None SubClass: None	
Responsibilities: It shows the stock graph on the page. Besides, users can also zoom in or out on the graph.	**Collaborator**:

Card 12	
Component: Sidebar	
Place: \frontend\src\components\SideBar	
Parent Class: None SubClass: None	
Responsibilities: It allows users to switch to different pages by clicking different buttons.	**Collaborator**: SidebarOption.js

Card 13	
Component: Drawing panel	
Place: \frontend\src\components\drawingPanel.js	
Parent Class: None SubClass: None	
Responsibilities: It allows users to draw on the panel. The drawing panel is the same as the stock panel.	**Collaborator**: Stock

Card 14

Component: Hotlist
Place: \frontend\src\components\Hotlist.js
Parent Class: None SubClass: None

Responsibilities: It displays 20 hot stocks and users can view stock's details by clicking the buttons.	**Collaborator**: button, header

Card 15
Component: Alarm
Place: \frontend\src\components\Alarmpage.js
Parent Class: None SubClass: None

Responsibilities: It allows users to set alarms on the website. Users can also change the alarm setting on this page.	**Collaborator**: button, selectors

Backend CRC Cards

Card 1	
Component: User list	
Place: \backend\controllers\auth.js	
Parent Class: None SubClass: None	
Responsibilities: It sends user information they searched on the search page.	**Collaborator**:

Card 2	
Component: Register	
Place: \backend\controllers\auth.js	
Parent Class: None SubClass: None	
Responsibilities: It allows users to register an account. It also send the feedback if any error ocurs	**Collaborator**:

Card 3	
Component: Login	
Place: \backend\controllers\auth.js	
Parent Class: None SubClass: None	
Responsibilities: It allows users to login. Users can also switch to reset the password on this page.	**Collaborator**:

Card 4	
Component: Logout	
Place: \backend\controllers\auth.js	
Parent Class: None SubClass: None	
Responsibilities: It allows users to logout by clicking the logout button on the sidebar.	**Collaborator**: Sidebar

Card 5	
Component: Profile	
Place: \backend\controllers\auth.js	
Parent Class: None SubClass: None	
Responsibilities: It allows users to see the profile by clicking the profile button on the sidebar.	**Collaborator**:

Card 6	
Component: database_connect	
Place: \backend\db\connect.js	
Parent Class: None SubClass: None	
Responsibilities: store the data	

	Collaborator: User

Card 7	
Component: User	
Place: \backend\models\User.js	
Parent Class: None SubClass: None	
Responsibilities: formalize the user information	**Collaborator**: database_connect

Card 8	
Component: reset_password	
Place: \backend\controllers\auth.js	
Parent Class: None SubClass: None	
Responsibilities: It helps users to reset the password.	**Collaborator**: database_connect

Card 9	
Component: find_friends	
Place: \backend\controllers\auth.js	
Parent Class: None SubClass: None	
Responsibilities: It helps users to search for other users stored in the database.	**Collaborator**: database_connect

Card 10	
Component: find_friend_in	
Place: \backend\controllers\auth.js	
Parent Class: None SubClass: None	
Responsibilities:It allows users to receive adding friend request.	**Collaborator**: database_connect

Card 11	
Component: find_friend_out	
Place: \backend\controllers\auth.js	
Parent Class: None SubClass: None	
Responsibilities: It allows users to send adding friend requests.	**Collaborator**: database_connect

| Card 12	
Component: add_friends	
Place: \backend\controllers\auth.js	
Parent Class: None SubClass: None	
Responsibilities: It is a request from other users to add them to their friend list.	**Collaborator**: database_connect

Card 13	
Component: accept_friend	
Place: \backend\controllers\auth.js	
Parent Class: None SubClass: None	
Responsibilities: It helps users to accept the request to add a friend.	**Collaborator**: database_connect

Card 14	
Component: reject_friend	
Place: \backend\controllers\auth.js	
Parent Class: None SubClass: None	
Responsibilities: It helps users to reject the friend request on their friends page.	**Collaborator**: database_connect

System architecture

System architecture Diagram

Three-tier-Architecture

Front End Page
(Presentation Tier)   React.

Use Api to get
Stock data

Get Information
About Users

HTTP
Rest Apis.

Back End

(Application/Logic)
Tier

Node.js
ExpressJs

(Another Data
Tier)

IEX Cloud
Database
& API.
(updated)

Fetch Data   Store Data

Data Base
MongoDB.
